Ordering Guide

A clear path to mission-ready ITC/AV products, integrated solutions, and related services.

CONTRACT SNAPSHOT

Linchpin Defense, LLC

CONTRACT	80TECH26D0793
CATEGORY	A · ITC/AV Solutions
PERFORMANCE	11/01/2026–10/31/2036
NAICS	541519
UEI · CAGE	NHS8SQ2PFVT4 · 9Y3X0

SEWP VI at a glance

NASA Solutions for Enterprise-Wide Procurement (SEWP) is a multi-award Government-Wide Acquisition Contract (GWAC) that gives federal agencies and approved contractors streamlined access to current Information Technology, Communications, and Audio-Visual (ITC/AV) products, solutions, and services. SEWP VI is scheduled to operate from November 1, 2026 through October 31, 2036.[1]

VEHICLE	CUSTOMERS	FEE
Multi-award GWAC	**Federal agencies**	**Up to 0.34%**

Fair opportunity

For orders exceeding **$10,000**, FAR 16.505(b)(1) requires each eligible contract holder to receive fair opportunity to be considered. The ordering contracting officer selects the method and documents the rationale for placement and price. NASA recommends using the online Quote Request Tool (QRT) to support the process and its acquisition record.[1]

Fair opportunity, simplified

- ✓ Define the requirement and evaluation approach.
- ✓ Release the request through the SEWP QRT.
- ✓ Evaluate, document, and retain the award decision.

The Linchpin advantage

Linchpin Defense is a SEWP VI Category A prime for ITC/AV Solutions. The vehicle supports integrated product-based requirements that combine hardware, software, communications, audio-visual technology, cloud, cybersecurity, peripherals, and related services under one acquisition strategy.[1]

PRODUCT + SOLUTION ACCESS

Hardware, software, communications, audio-visual, cloud, cybersecurity, peripherals, and related product-based services.

LIFECYCLE COORDINATION

Plan OEM, licensing, warranty, configuration, delivery, installation, testing, and acceptance needs in the RFQ.

Use either contact for quotes, order questions, and post-delivery support. Include the solicitation or order number whenever available.

NASA SEWP CUSTOMER SUPPORT

(301) 286-1478 help@sewp.nasa.gov
Orders: sewporders@sewp.nasa.gov
Fax: (301) 286-0317
support.sewp.nasa.gov

Before requesting a quote

- ✓ Requirement description or bill of materials
- ✓ Quantity, delivery location, and required date
- ✓ Technical, security, and compliance requirements
- ✓ Evaluation criteria and quote due date
- ✓ Agency point of contact and funding context

What is in scope?

SEWP VI covers a broad, continuously evolving range of ITC/AV offerings. Contract holders can add commercial technology and eligible services as customer requirements evolve. NASA can review a requirement or bill of materials when scope is uncertain.[1]

YOUR LINCHPIN VEHICLE

Category A ITC/AV Solutions
ITC/AV products, solutions, and related product-based services.

Category B Enterprise-Wide Services
Enterprise-wide ITC/AV service solutions.

Category C Mission-Based Services
Mission-based ITC/AV service solutions.

How to place an order

The issuing agency—not the NASA SEWP Program Management Office (PMO)—creates the purchase request and delivery order. NASA reviews, processes, tracks, and forwards issued orders to the selected contract holder. Agency-specific acquisition policy still applies.

1. **Define the requirement**
   Build the technical description, statement of objectives, or bill of materials. Identify quantities, delivery needs, security requirements, and evaluation factors.
2. **Validate scope and acquisition strategy**
   Confirm Category A fit. If needed, request NASA scope feedback. The ordering contracting officer determines the fair-opportunity method and any set-aside approach.
3. **Release the request in the SEWP QRT**
   Create the RFQ or RFI in the online tool, select the applicable category or suggested source, provide a clear response deadline, and attach the complete requirement.
4. **Evaluate and issue the delivery order**
   Evaluate quotes under the solicitation criteria, document the decision, obtain approvals and funding, and issue the agency's valid delivery order against **80TECH26D0793**.
5. **Route through the SEWP PMO**
   Send the signed order to sewporders@sewp.nasa.gov or fax (301) 286-0317. Route later modifications through the PMO as well.

Order package essentials

- ✓ Agency delivery-order number and issue date
- ✓ SEWP VI contract number 80TECH26D0793
- ✓ Line items, quantities, prices, and total
- ✓ Bill-to and ship-to information
- ✓ Government contracting and technical contacts
- ✓ Delivery schedule or performance period
- ✓ Funding, payment, and applicable clause data

Keep the routing clean

Do not treat the Linchpin quote or acknowledgement as a substitute for agency award documentation. The SEWP PMO must receive the signed order and every modification.

Installation, warranty, and post-delivery support

01 · INSTALLATION + ACCEPTANCE
Installation, configuration, testing, and acceptance support are governed by the awarded order and accepted quote. Confirm site, access, scheduling, and acceptance criteria before performance.

02 · WARRANTY + SOFTWARE
Basic and extended warranty, licensing, subscriptions, and software support are product-specific. Applicable OEM or publisher terms should be identified in the quote and retained with the order file.

03 · PROBLEMATIC ORDER
Contact Linchpin Defense Program Support with the contract and order numbers, affected line item, serial or license identifier, issue description, mission impact, and troubleshooting already completed.
